Best in class structural integrity

6 POINT PROTECTION PLAN

1 Thicker bases on coffins
12 mm MDF base on composite board coffins for greater peace of mind

4 Staples
Coffin bases are reinforced with staples for greater protection

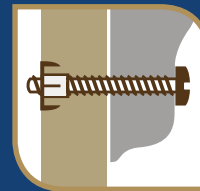

2 Water based glue
Coffin base and sides are secured using water based glue to ensure strength

5 Strategically placed timber blocks
Coffins are reinforced with at least 6 strategically placed slanted or rectangular timber blocks to ensure rigidity

3 8 screws per coffin
Bases are secured with 8 screws per coffin for strength and added product integrity

6 Handles are bolted
Handles are secured with bolts and T nuts. The T nuts are barbed to eliminate any rotation and to ensure a sturdy fix

Global Funerals are committed to providing families with best in class caskets and coffins. All our caskets and coffins are manufactured with an enhanced structural integrity program.

A dark blue background with a large, light blue diagonal shape. On the left side, there is a silhouette of a tree with many branches. The text is positioned on the right side of the image.
